The IFRA Standards regarding use restrictions are based on safety assessments by the Panel of Experts of the RESEARCH INSTITUTE FOR FRAGRANCE MATERIALS (RIFM) and are enforced by the IFRA Scientific Committee.

Symrise considers all aspects of the IFRA Guidelines and best practice relevant to the fragrance oil mentioned above. The maximum use level provides a safety assessment and considers currently available information, both external and internal, pertaining to fragrance materials and their properties in addition to any evaluation completed by IFRA.

It is the ultimate responsibility of our customer to ensure the safety of the final product (containing this fragrance) by further testing if need be.

For other kinds of application or use at higher concentration levels, a new evaluation may be needed, please contact Symrise.

According to the IFRA Code of Practice (as reported under the 44th Amendment), due to the potential for certain fragrance materials to form nitrosamines in nitrosating systems, the presence in a fragrance formulation of any of these substances must be reported to the customer. In accordance with this requirement, we advise you that the subject fragrance does not contain any of the concerned materials as listed below*.
